smartplastic™

Anti-Fungal Additive

Controls bacteria and fungi with particular focus on *M. Piriformis* and *P. Roqueforti*

- Proven to extend shelf life of foods such as breads and cheese
- Simple minimal inclusion to finished film production process
- Numerous applications in plastics including packaging, agriculture, medical, etc.
- Independent laboratory testing proven
- Made in U.S.A.

Small changes that make big differences

SmartPlastic additives are inserted into the production process at very small percentages along with other standard ingredients.

The resulting "Smart Plastic" is changing industries and making a difference in people's lives.
