smartplastic™

# Tracer Additive

## Protects products from counterfeiting

- Advanced technology system provides plastic with a unique traceable property
- Simple minimal inclusion in finished film production process
- Applicable in majority of plastics
- Extensive independent testing proven reliability
- Made in U.S.A.

## Small changes that make big differences

SmartPlastic additives are inserted into the production process at very small percentages along with other standard ingredients.

The resulting "Smart Plastic" is changing industries and making a difference in people's lives.
